1. Applicant's arguments and request for reconsideration has been fully and carefully considered and have been found to be persuasive.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

Page, 1, Paragraph [0001] insert --This application is a divisional of 10/287,387, filed November 4, 2002, now United States Patent 6, 638,396.--

3. The following is an examiner's statement of reasons for allowance:

The invention relates to an apparatus for processing waste, the plasma reactor apparatus comprises a rotatable drum having an inlet and outlet ends with the inlet end attached to an inlet bulkhead by a first seal and the outlet end attached to an outlet bulkhead by a second seal. The bulkhead/seal arrangement has not been taught by the prior art. The apparatus further includes an enclosure disposed about the drum having an inlet end with an enclosure inlet opening and an outlet end with an enclosure outlet which circulates hot gas over the outside of the drum to heat the material in the drum. The plasma reactor is connected to the drum outlet bulkhead opening for receiving and process waste from the drum. The plasma reactor having a gas removal opening connected to the drum enclosure inlet opening for removing the gas created by the reactor and at least one other opening for removing molten material from the reactor and a recirculation blower having an inlet connected to the drum enclosure outlet opening and a blower outlet connected to the gas removing opening of the plasma reactor for blending the created reactor gas with gas circulated around the drum. The
